

## **USAID Boresha Afya Biharamulo**

Health Promotion Tanzania is partnering with a consortium of three partners, led by **Jhpiego**, an affiliate of Johns Hopkins University, with partners **Engender Health** and **PATH** for the implementation of USAID Boresha Afya Project. The overall goal of USAID Boresha Afya is to increase access to high quality, comprehensive and integrated health services with focus on maternal, new born child and reproductive health outcomes by addressing key barriers such as delay in seeking health care, delay to health services and delay to access health services, to improve the health status of all Tanzanian.

HDT is the lead implementing partner of the project in Biharamulo District since August 2018. The project covers 31 villages which are in five selected wards of Lusahunga, Runazi, Kalenge, Nyabusozzi and Nyakahura. Also, HDT is working with 81 active Community Health Workers (CHWs) working under 7 health facilities of Lusahunga, Nyakahura, Nyakanazi, Kalenge, Runazi, Ngararambe and Nyabusozzi. CHWs mobilize people especially women of reproductive age, children under five and their caregivers to come to the facility and access health care.

Through CHWs mobilization, the project has contributed to the increase of facility delivery from 50 women in June 2018 up to 130 women from 5 wards in Biharamulo District in December 2018

through Gulio la Afya, community score card, managed to bring changes to the community to have ability of building their healthy facilities at their villages eg. Musenyi and providing a variety of health services (Malaria, FP, RCH services, CHF enrolment and HIV/AIDS to the mass through Gulio la Afya.
