

# HDT EXPANDS TO MBINGA

HDT continues to expand her coverage from the lake zone and has now reached the southern highland zone. Early March 2016, HDT opened a new office in Mbinga District in Ruvuma Region. Health Promotion now has offices in four districts of Tanzania; Dar es Salaam where the main office is, Ngara and Biharamulo in Kagera Region and now Mbinga.

HDT's Executive Director, Dr. Peter Bujari setting an organization signboard in Mbinga

Health Promotion Tanzania is currently implementing a PEPFAR funded HIV project through HJFMRI (Walter Reed Program) “*Civilian, Community HIV Prevention and Home Based Care*”. The project targets Priority Population in this case adolescent girls and young women and Key Population (men who have sex with men, female sex workers and people who inject drugs). In this project, HDT will cover 21 wards and the project is expected to end in February 2018.

CCHP-HBC project will be contributing to 90% coverage of people who have tested for HIV and know their status, 90% recruitment to anti-retroviral therapy for those who have tested HIV positive and 90% retention to CTC for AGYW and key populations.

The new office is located in Mbinga town, Kihaha Street near Goldfarm Lodge. The office brings together a dedicated team of HIV prevention, HIV counselling and Testing and Home Based Care. We have enjoyed support of Government and partners in the area. For Ruvuma contact: [Ruvuma@hdt.or.tz](mailto:Ruvuma@hdt.or.tz)
